

2002 PNC/PNC Session with C&C

Creation of a New Intellectual Culture In a Knowledge Society

Broadband Network to Link the 3C's

The University of Shimane

Prof. Yuji Masuda

The IT revolution based on digital technology

Is about to substantially change our whole

Social fabric as a knowledge Society

It transforms the way our social system is

Structured and the way it functions.

The three C's (Civilization, Culture and Communication)

That are the weft and woof of our present-day society

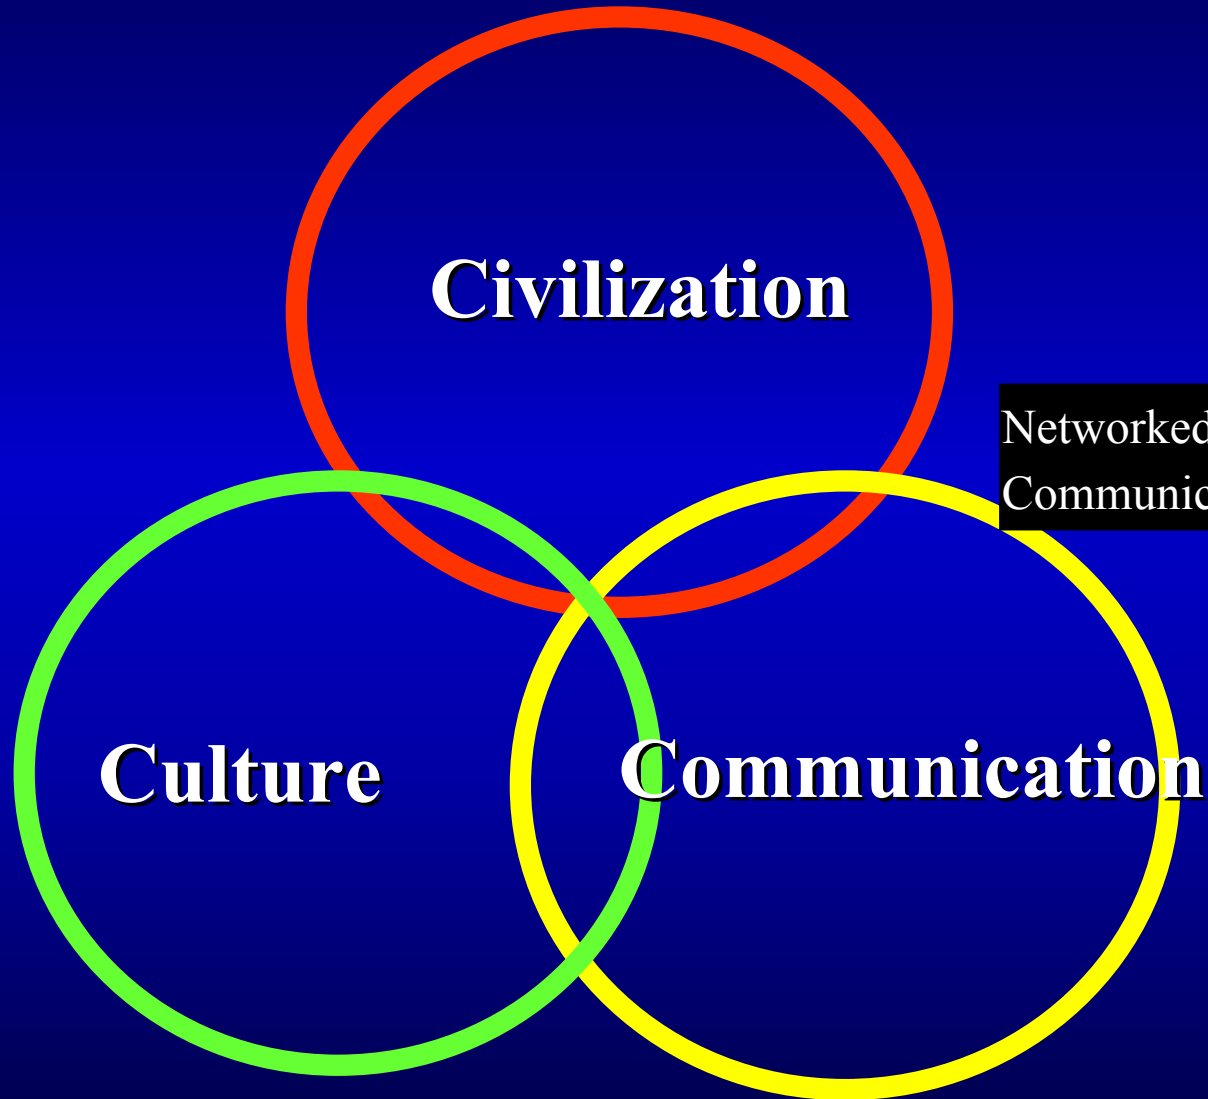

Are glue.

Through this linkage, we are about to see

The emergence of

a new knowledge society.

Broadband digital network to Link three C's

Networked Interactive
Communication

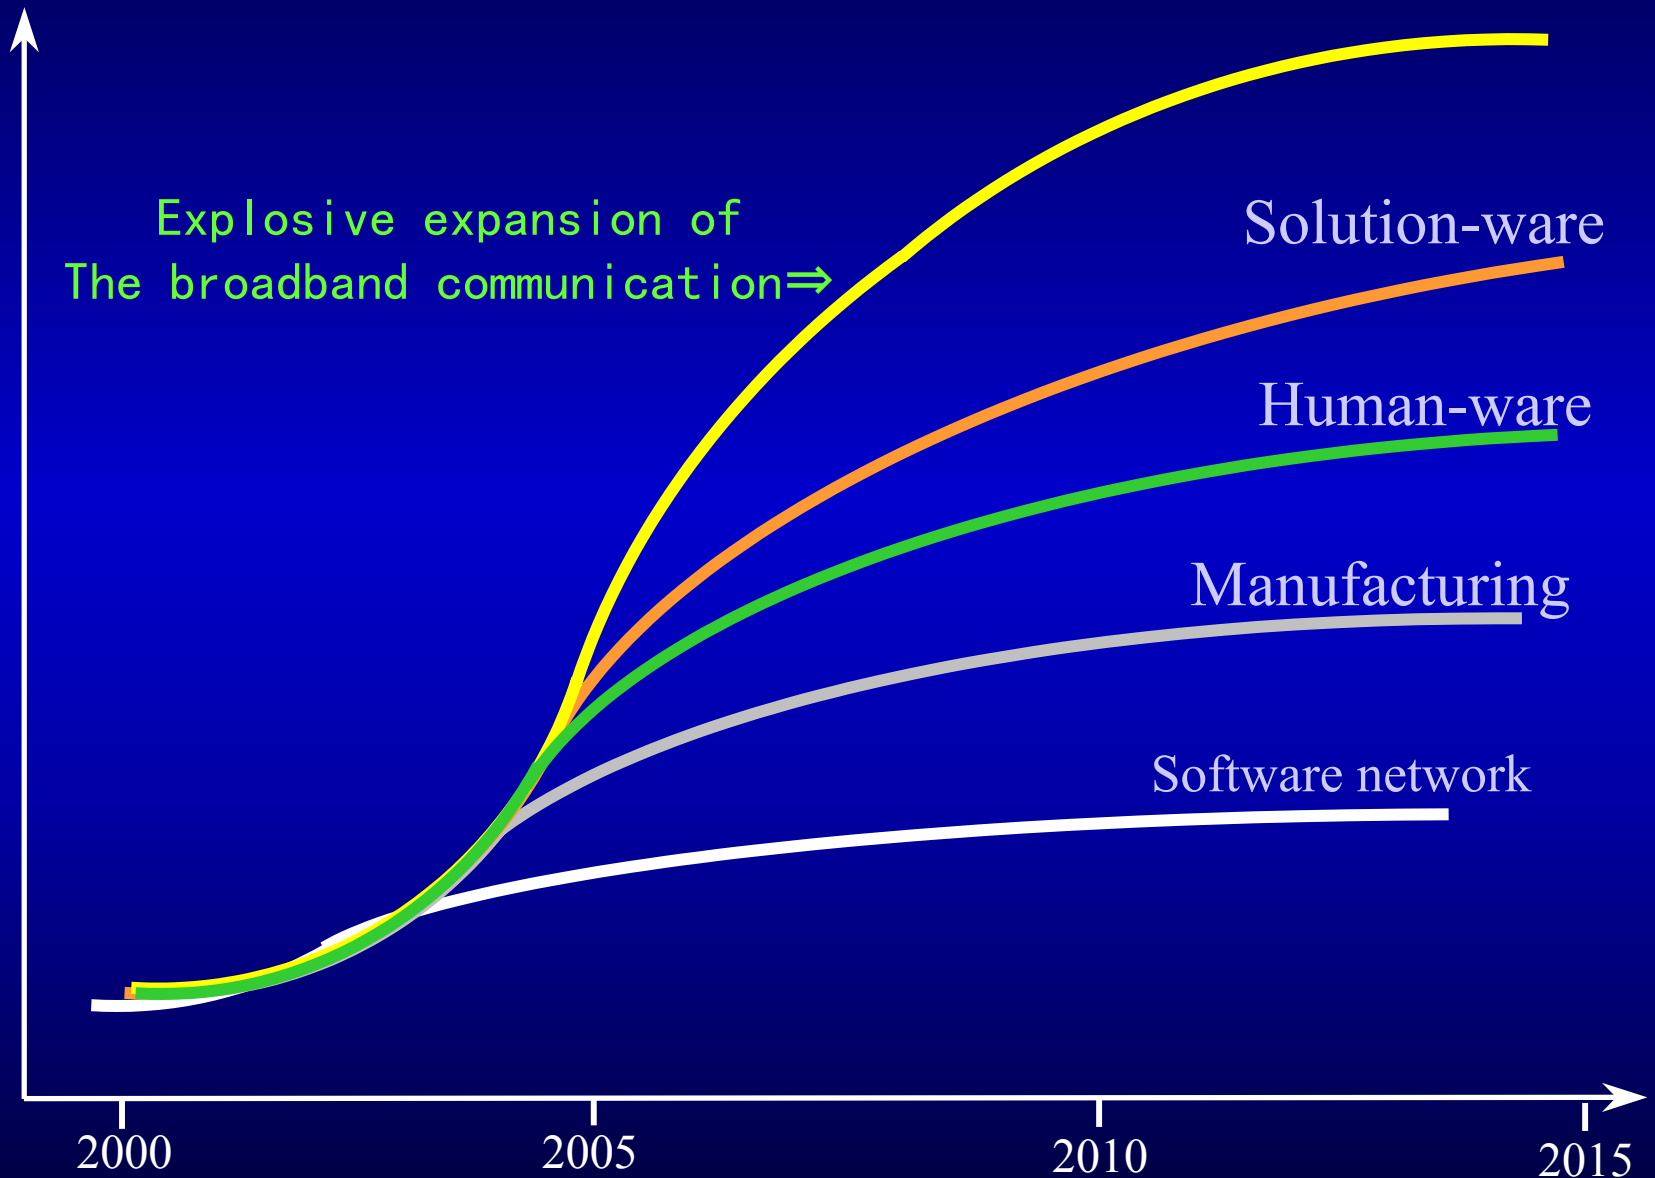

In this Knowledge Society, digital technology

Is the linkage that constitute

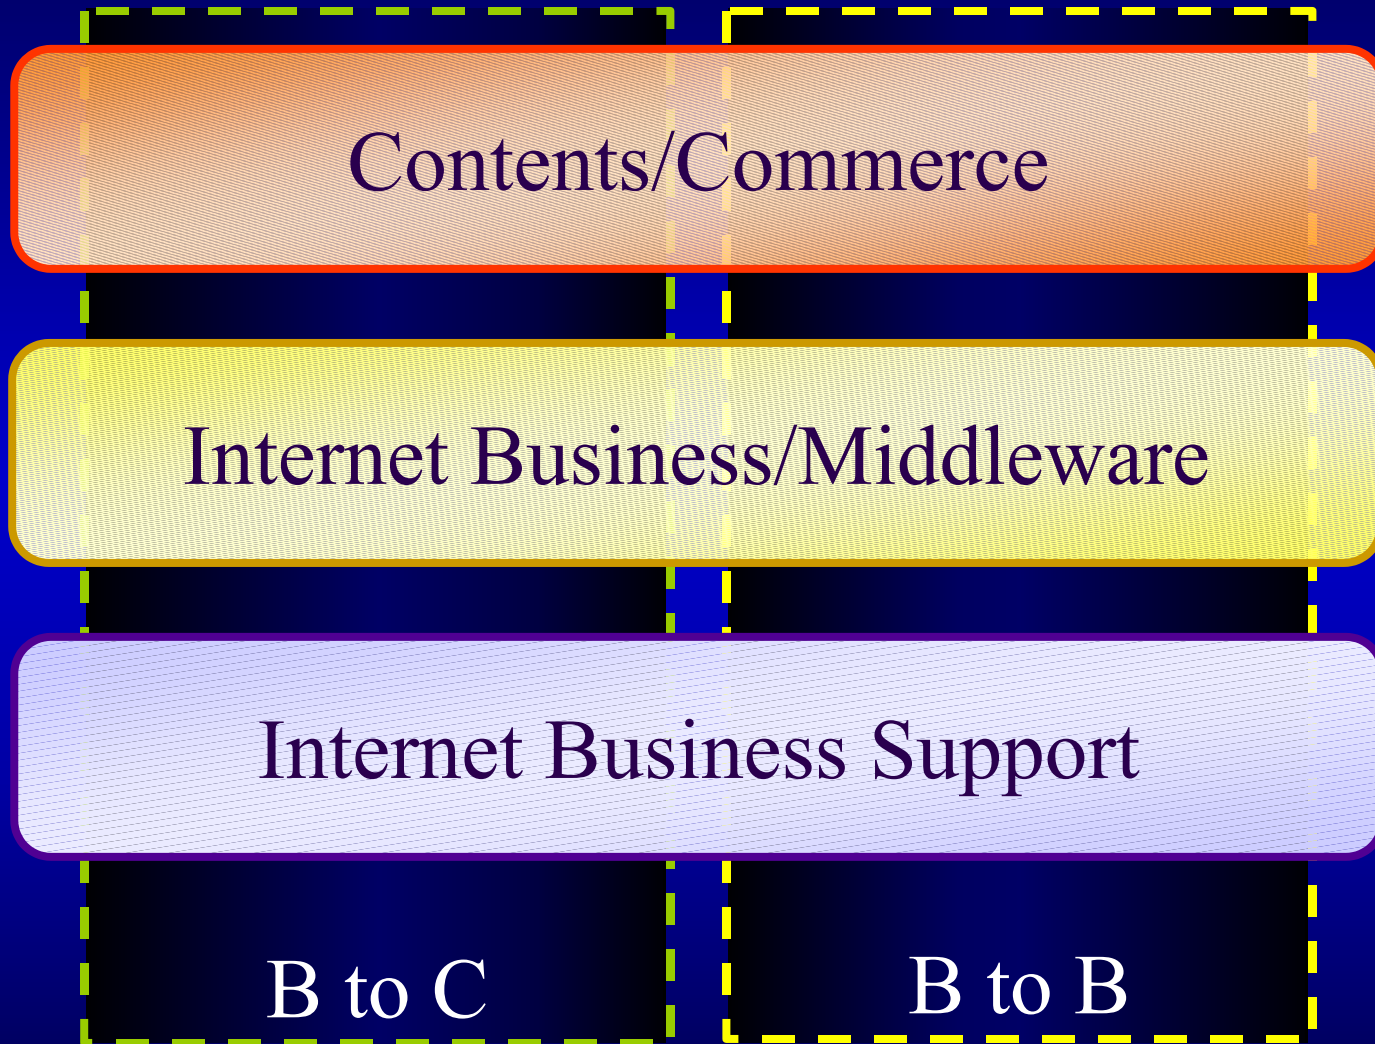

The unity of the digital and living spheres

As well as the communication sphere.

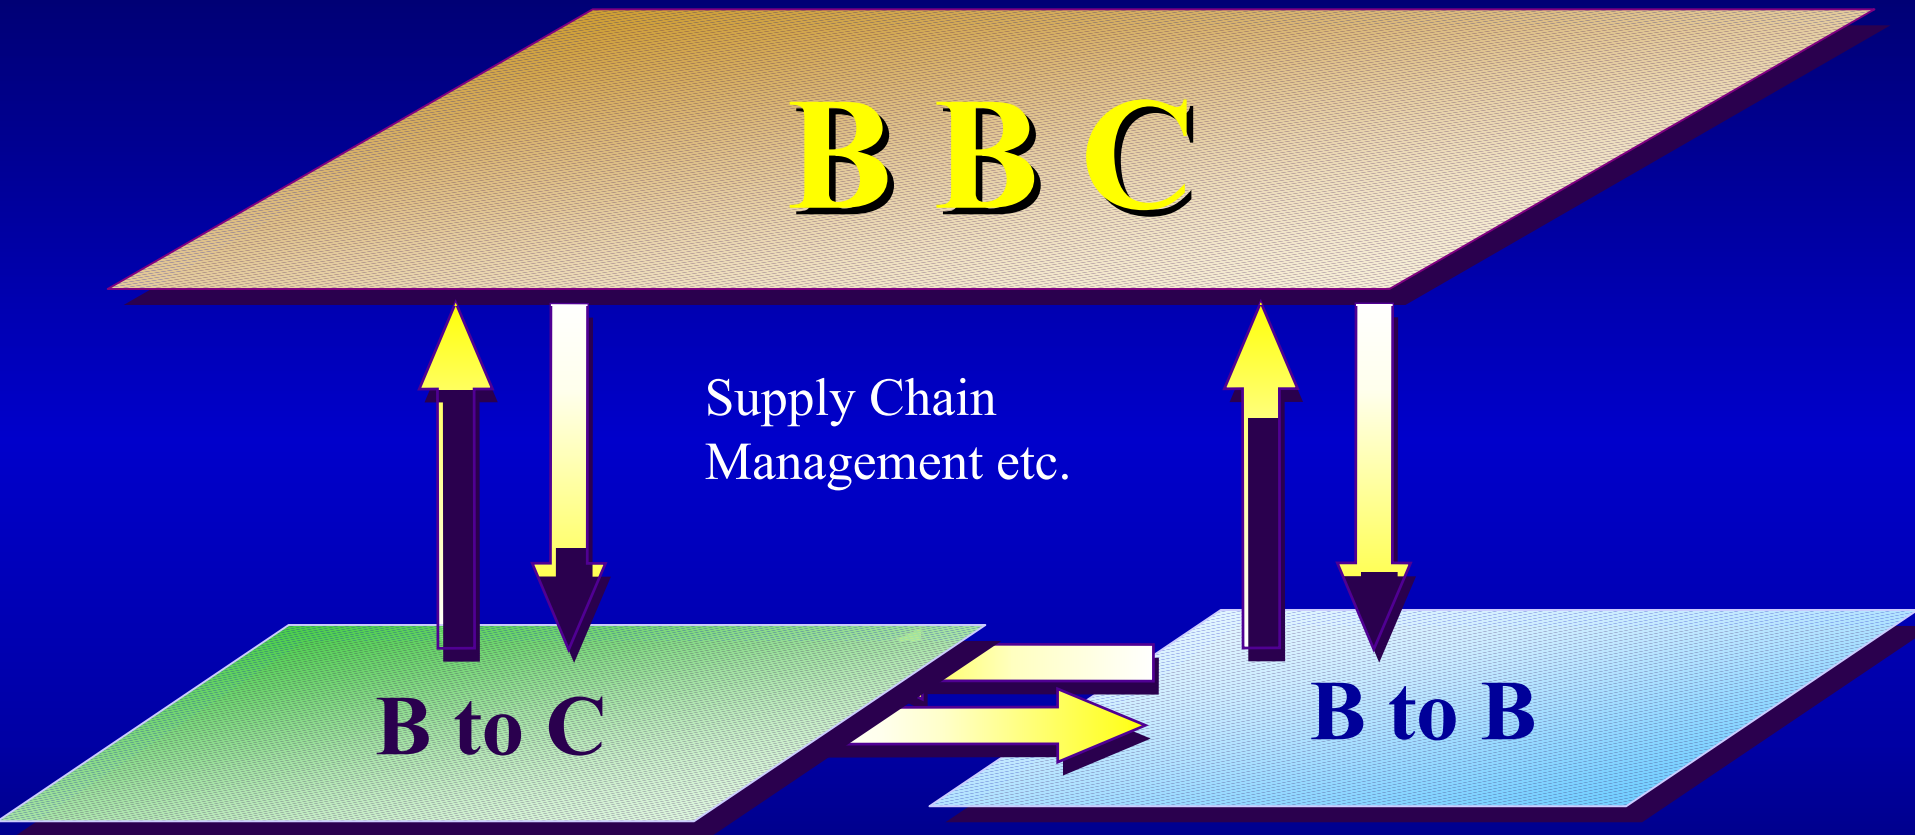

The Broadband network as the Platform

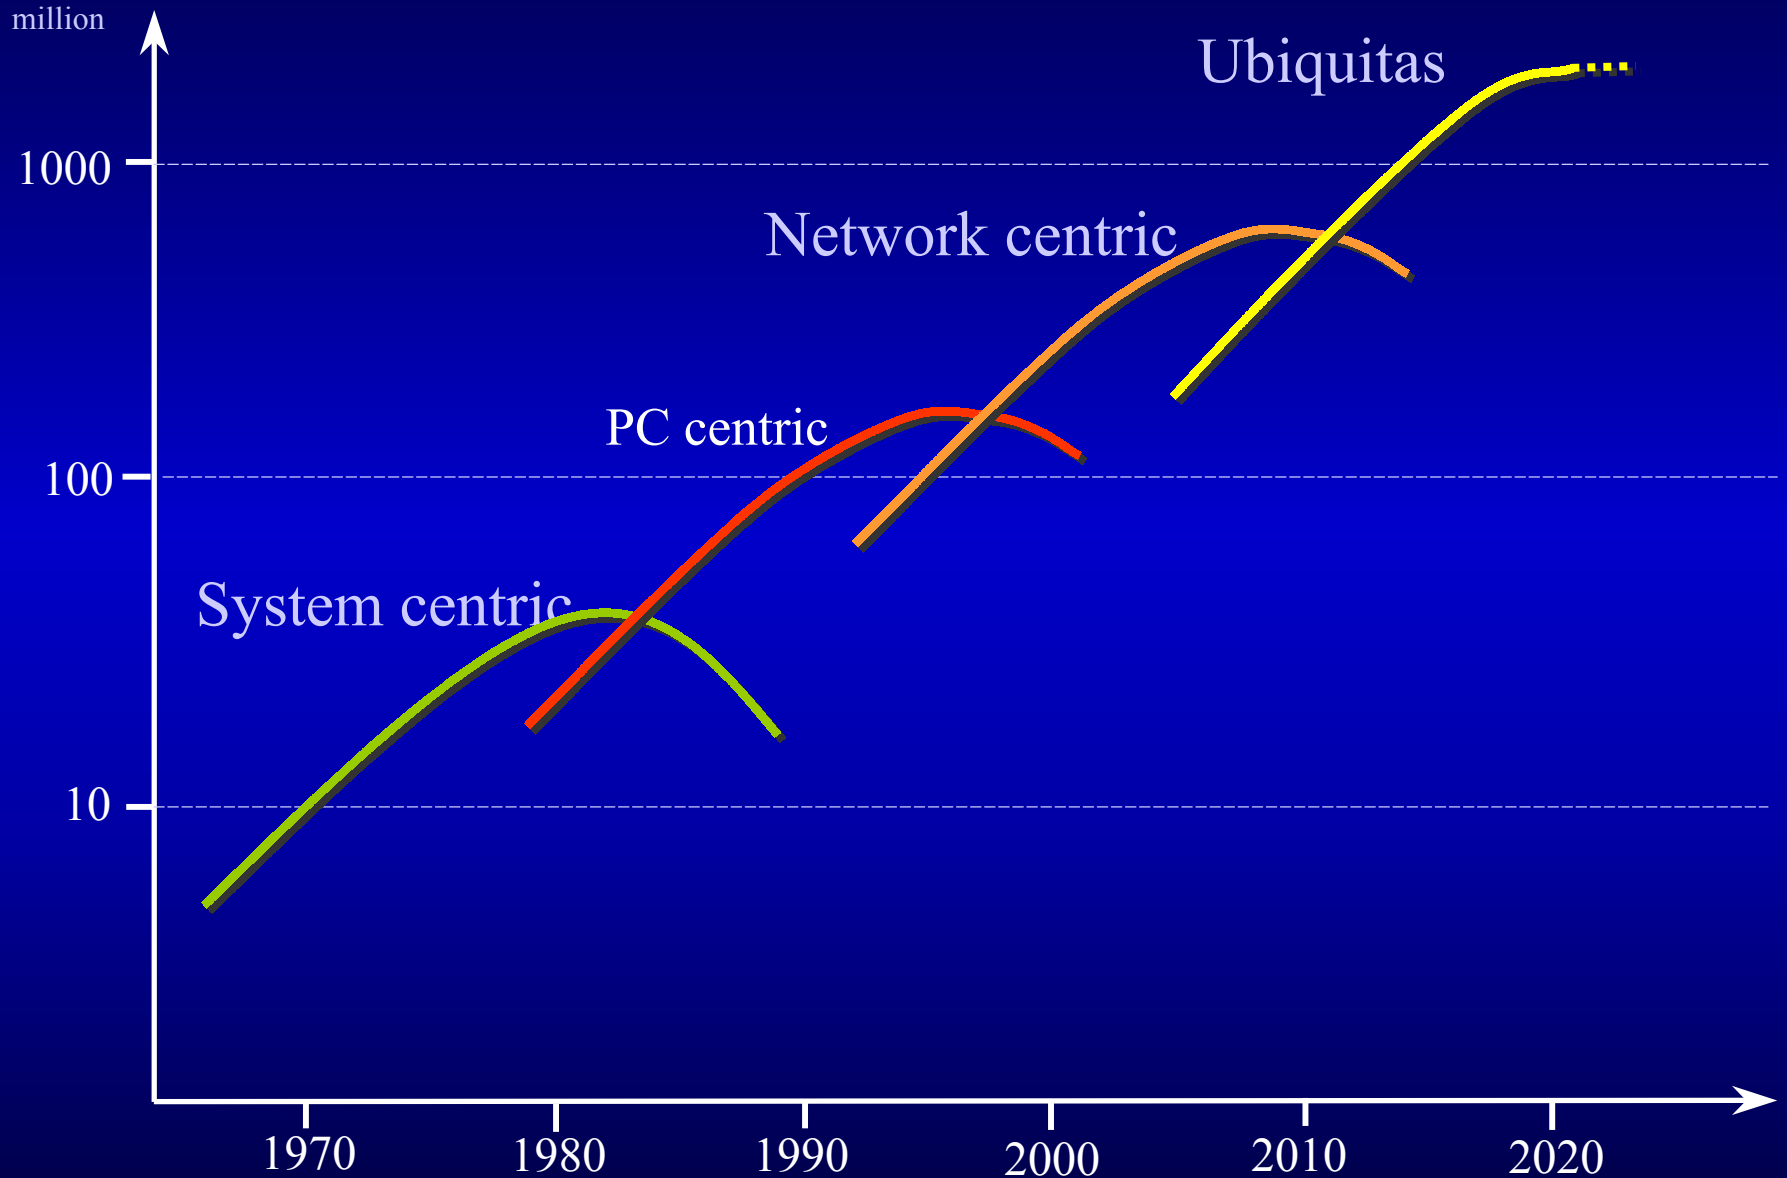

Domain map of Internet Business

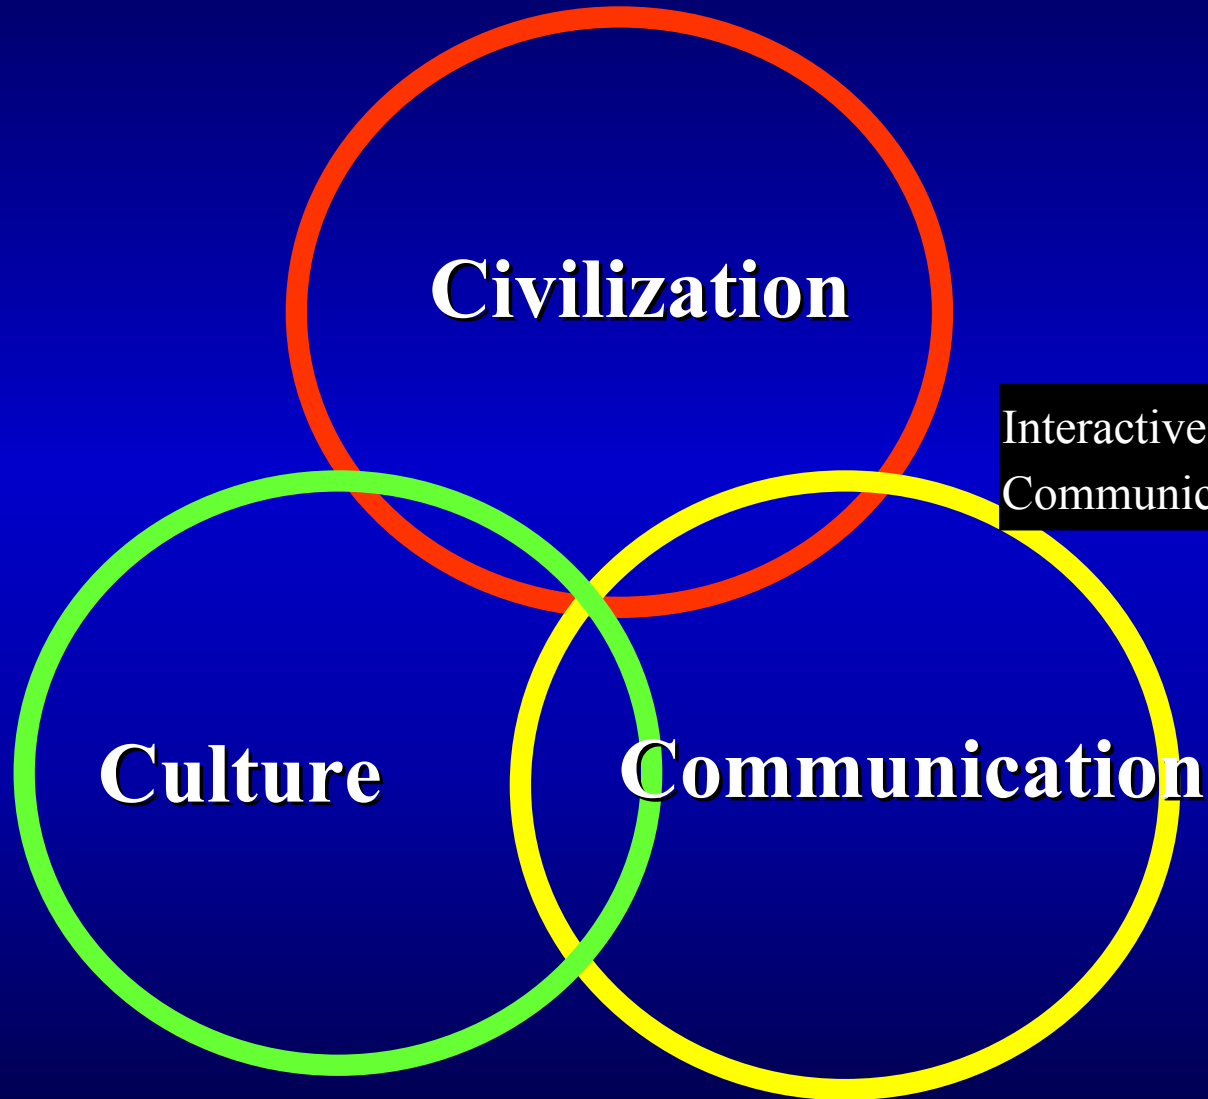

Development of EC to the Cyber/Real World

The Shifting technology of Computing

Broadband Ubiquitous Network to Link three C's

Interactive Ubiquitous
Communication

Ubiquitous network Society
